TODO

- Make our own theme/UI
  - Font
  - Color pool (Yellow, Orange, Red, Brown)
    - We’re in Fall semester, so maybe more fall colours
    - Primary color (orange)
    - Secondary color (yellow)
    - Title
    - Subtitle
    - Text
    -
- Design our own logo

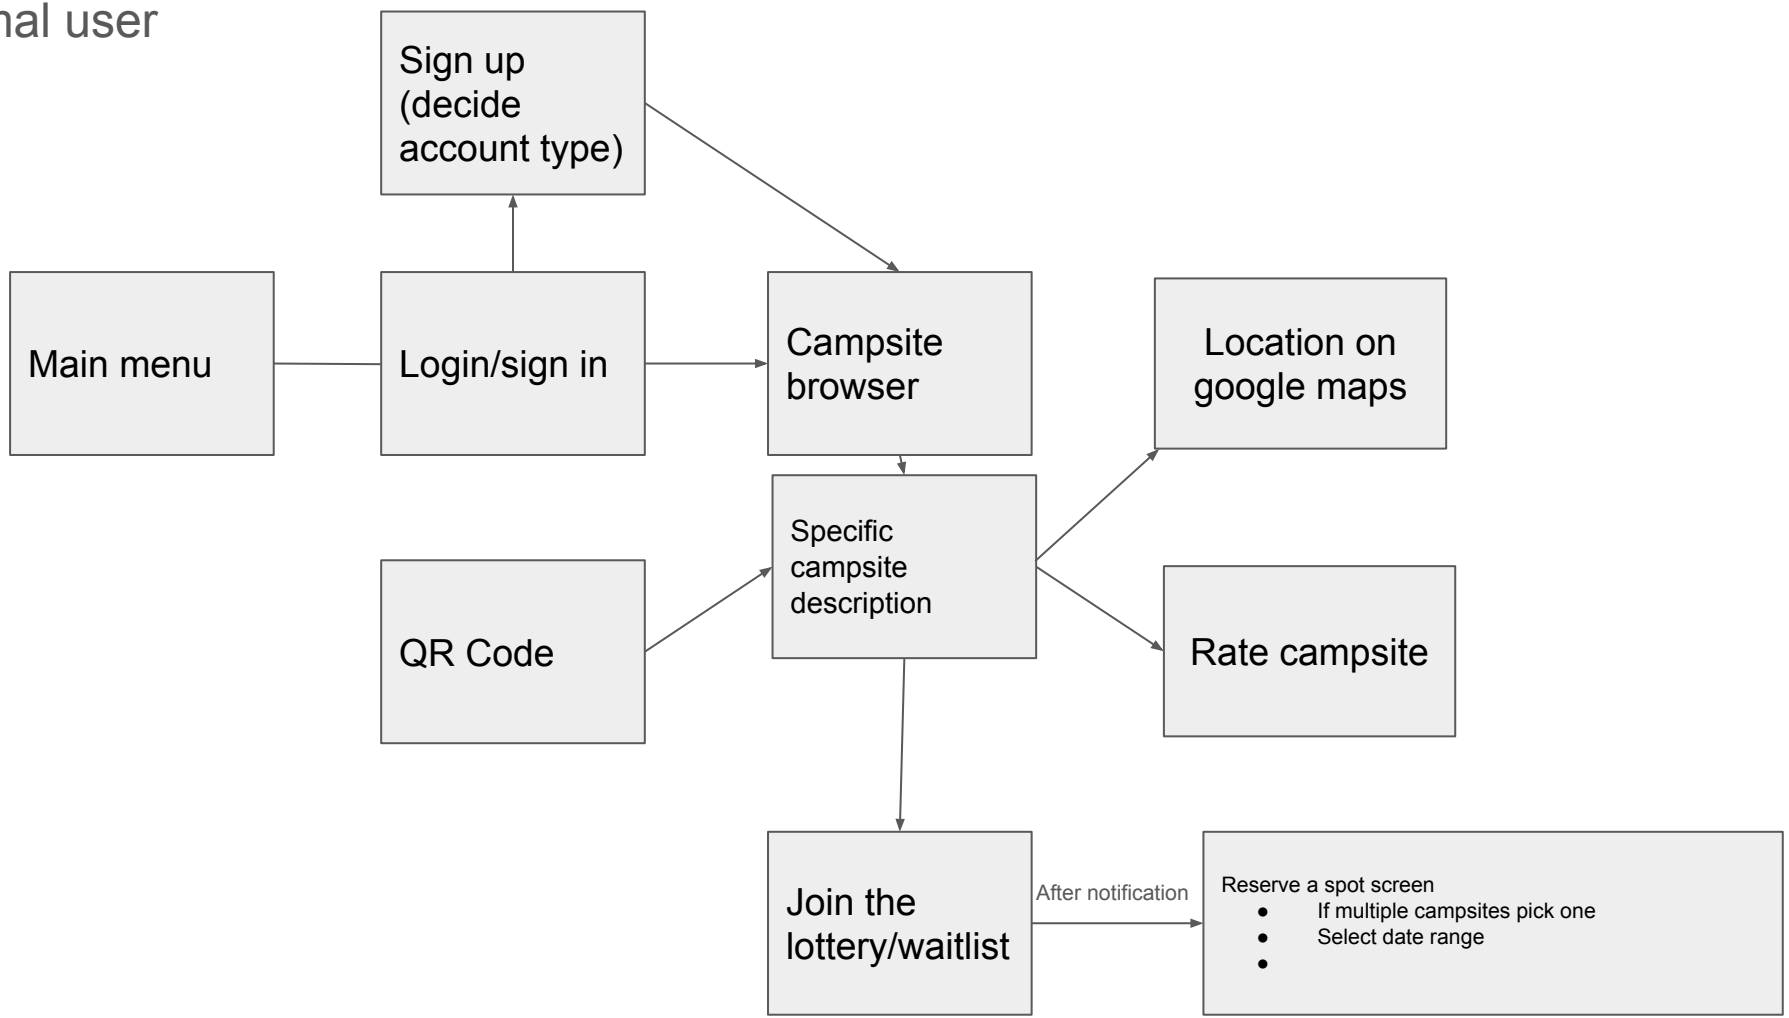
Requirements

- Main menu
- 3 different scenarios to consider -> user, owner, admin.

Questions

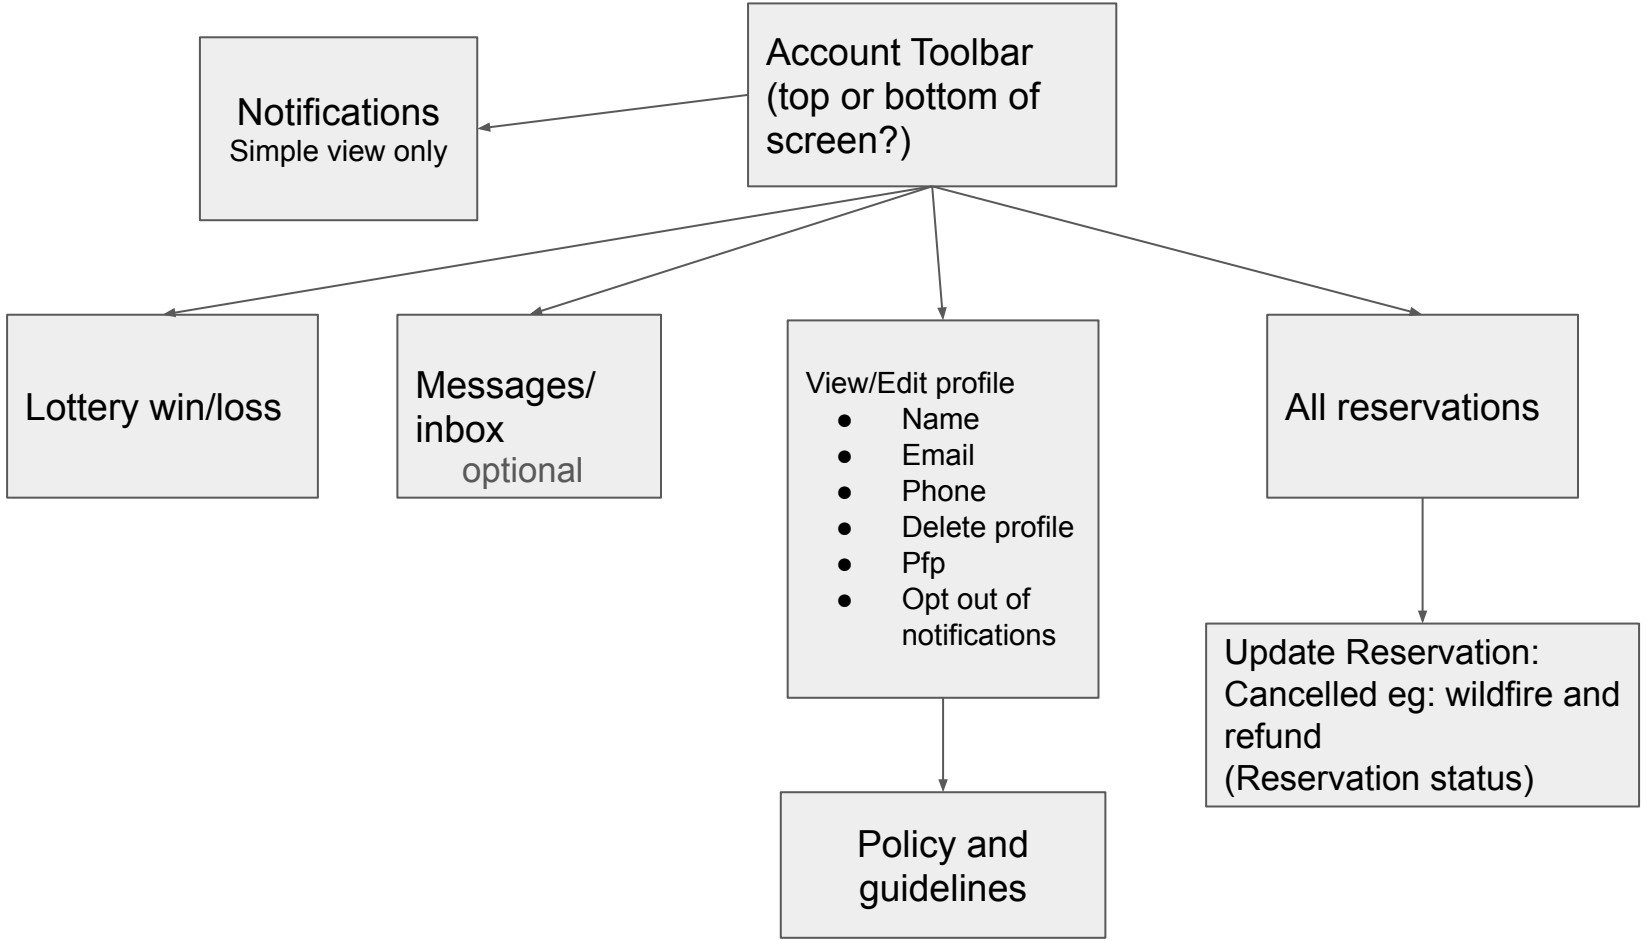
- User interaction:
  - Difference between messages and notifications? Can we possibly
  - For admin - should we just add extra buttons or make admin specific tabs that list everything
- Deliverables for project part 2
  - For figma - is hand drawn fine or proper figma?
  - Is storyboard flowchart and UI on figma with arrows a single deliverable? Or two separate things?

Normal user



Sign up (decide account type)
Main menu
Login/sign in
Campsite browser
Location on google maps
Specific campsite description
QR Code
Rate campsite
Join the lottery/waitlist
After notification
Reserve a spot screen
If multiple campsites pick one
Select date range

Normal user



Account Toolbar (top or bottom of screen?)
Notifications
Simple view only
Lottery win/loss
Messages/ inbox
optional
